

THREATWATCH CYBERLAB

*A Gamified Intrusion Detection
Training Platform*

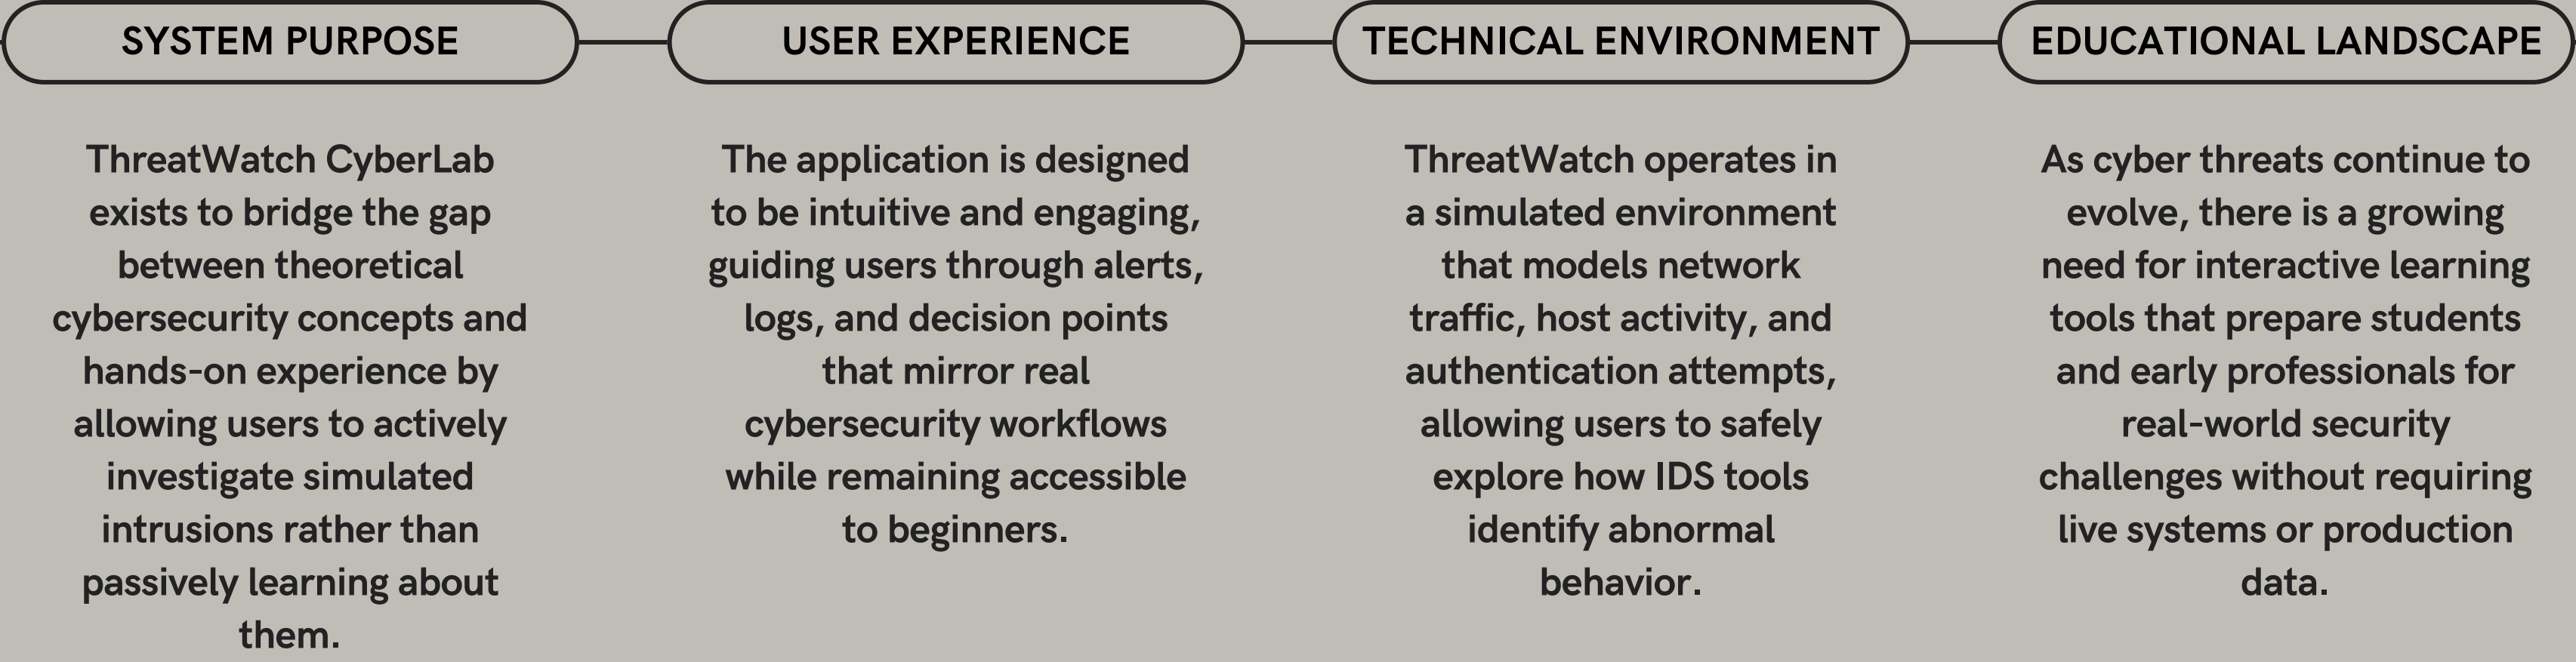

OVERVIEW

THREATWATCH CYBERLAB IS A DESKTOP-BASED, GAMIFIED CYBERSECURITY TRAINING APPLICATION DESIGNED TO HELP STUDENTS AND EARLY-CAREER PROFESSIONALS LEARN HOW INTRUSION DETECTION SYSTEMS (IDS) WORK IN REAL-WORLD ENVIRONMENTS. THE PLATFORM SIMULATES COMMON CYBER THREATS SUCH AS NETWORK INTRUSIONS, HOST-BASED ATTACKS, AND PASSWORD CRACKING AND ALLOWS USERS TO INVESTIGATE ALERTS, ANALYZE LOGS, AND MAKE SECURITY DECISIONS THROUGH INTERACTIVE GAMEPLAY.

CONTEXT

THREATWATCH CYBERLAB IS A GAMIFIED CYBERSECURITY TRAINING APPLICATION DESIGNED TO SIMULATE HOW INTRUSION DETECTION SYSTEMS (IDS) OPERATE IN REAL-WORLD ENVIRONMENTS. THE PLATFORM FOCUSES ON HELPING USERS UNDERSTAND HOW SECURITY TOOLS DETECT THREATS, INTERPRET ALERTS, AND RESPOND TO SUSPICIOUS ACTIVITY THROUGH INTERACTIVE, SCENARIO-BASED GAMEPLAY.

GOALS

- 1 Teach users how different types of intrusions are detected by IDS tools
- 2 Help users recognize indicators of compromise such as abnormal traffic, failed login attempts, and suspicious system behavior
- 3 Simulate real-world cybersecurity roles and workflows
- 4 Increase user engagement and retention through game-based learning
- 5 Provide clear feedback explaining why an alert was triggered and how it was resolved

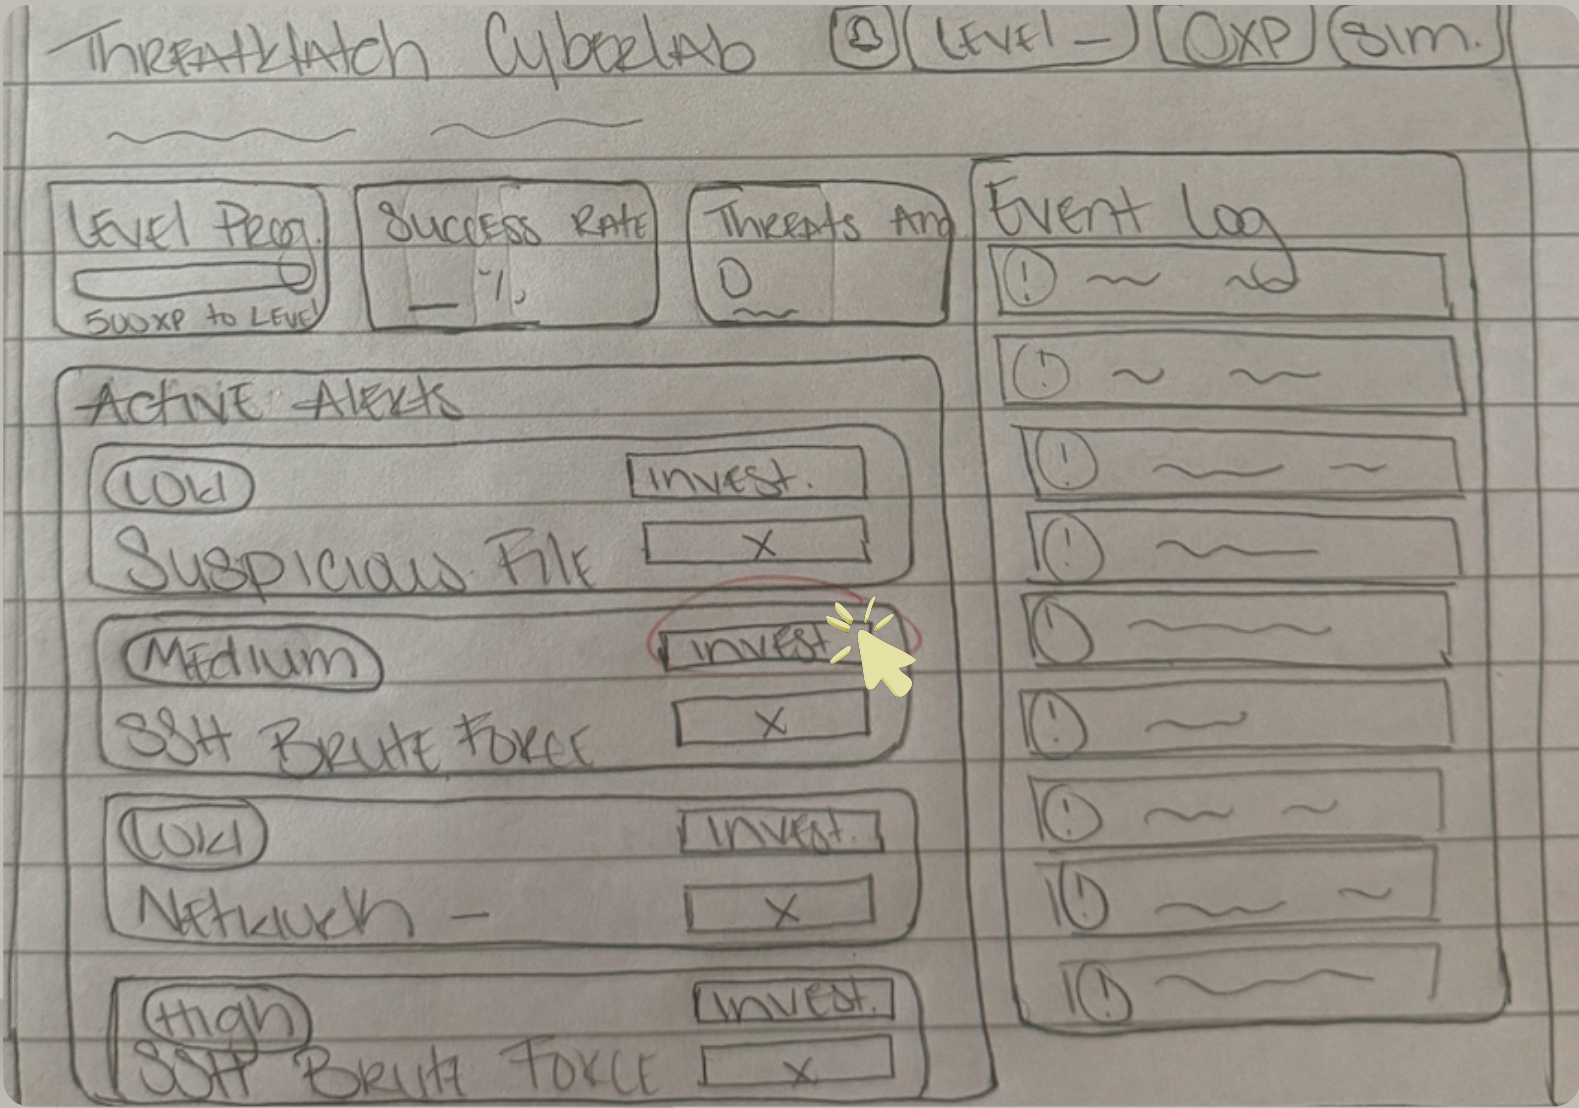

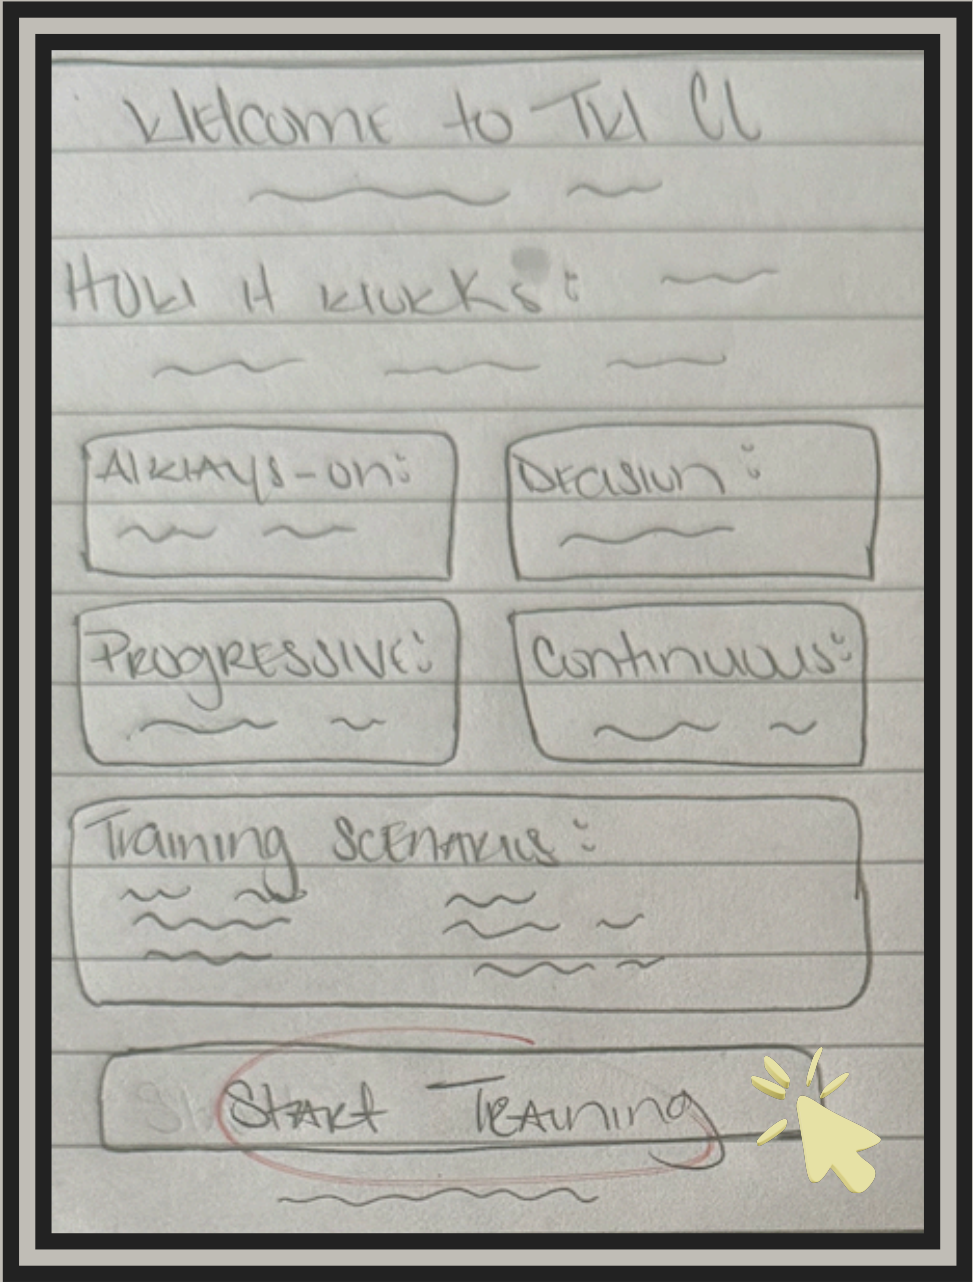

NON-GOALS

- 1 The platform is not intended to be a real-time or production-grade IDS
- 2 It does not perform live network monitoring or system scanning
- 3 It is not designed to replace professional cybersecurity tools
- 4 he application does not train users to conduct attacks, only to detect and respond to them

PERSONAS

SEKANI GRAY	CHRISTIANA LOVE	DR. ANGEL RYDER	PERSONA X	PERSONA Y
Background: Entry-level SOC analyst monitoring enterprise networks Experience Level: Beginner-Intermediate Goals: • Detect abnormal network traffic • Investigate IDS alerts efficiently • Reduce false positives	Background: System administrator responsible for host security and integrity Experience Level: Beginner Goals: • Monitor system activity and logs • Identify host-based intrusions • Respond to unauthorized changes	Background: Cybersecurity professor and industry mentor Experience Level: Advanced Goals: • Teach IDS concepts in practice • Evaluate student decision-making • Reinforce ethical security principles	Background: TBD Experience Level: TBD Goals: •	Background: TBD Experience Level: TBD Goals: •
